Secondary Education (Mathematics specialist)

Work Experience

Grade 10 & 11 Teacher

September 2014- present

Jonathan Grant High School

Spanish Town, Jamaica

- Ensure students achieve learning outcomes that are above average in the subject of mathematics by instructing students in a clear, concise and fun way
- Prepare lesson plans that are engaging and incorporate cooperative learning strategies that will build students understanding of Mathematics
- Regularly communicate with parents and legal guardians regarding child's performance, track and record student progress and keep records up to date for progress reports and parents' consultations.
- Work closely with members of the department to ensure that we cultivate a classroom culture conducive to learning.

Grade 10 & 11 Mathematics Teacher

September 2012- August 2014

Edith Dalton James High School

Kingston, Jamaica

- Write detailed lesson plans to ensure students mathematical needs were catered for.
- Plan interactive lessons that catered to the needs of various learning styles
- Attend various professional development seminars that improve my knowledge as a teacher.

Grade 8 Teacher

September 2011- April 2012

Jonathan Grant High School

Spanish Town Jamaica

- Plan and execute fun and exciting lessons
- Review syllabus and execute plans for improvement, and provide tutoring and additional support for students
- Act as a role model by making students feel motivated to do exceptionally well in Mathematics
- Attend school events to better understand student interest and personalities outside of the regular classroom.
